

# ARGUS wt

Line Quality Management System

Engineered for your success

# Monitor your entire packaging process to help ensure quality throughout your line

In a world where efficiency and quality are critical, ARGUS is proving to be a powerful line management software for enhanced device and job management.

With its limitless extensibility and adaptability, it is the key to maintaining control and effectiveness on multiple lines in an ever-evolving business landscape. ARGUS empowers you to manage your devices and tasks with ease and precision, helping ensure product quality, compliance and efficient operations.

## ARGUS KNOWS NO LIMITS

One of the outstanding features of ARGUS is its boundless scalability. There are no limits to what you can achieve. As you expand your operations, ARGUS expands with you, adapting to your evolving needs. The more devices and jobs to manage, the stronger ARGUS gets.

## Keep it compliant 21 CFR Part 11 and GAMP

ARGUS supports you in complying with all relevant regulatory requirements of your industry and helps

ensure that your products and packaging meet the highest quality standards.

## Secure your data integrity and future-proof your production

### DATA INTEGRITY

Protect your data from change or loss. ARGUS provides a reliable and secure data infrastructure to help ensure the integrity of your production data while creating a consistent database for analysis and reporting.

### IT SECURITY

No longer worry about protecting your data from cyber-attacks. The ARGUS line quality management system follows the latest IT security standards to help protect your data from threats and ensure a secure production environment.

### FUTURE-PROOF

ARGUS can be continuously expanded with additional devices, enabling your production to always be efficiently adapted to future quality and safety requirements. Whether it is setup, maintenance, or monitoring, ARGUS makes it easy for you to control your equipment and create an efficient production environment.

### MULTI-LINE SUPPORT

Once created, formats and jobs can be easily transferred to other lines, saving you valuable time and effort.

## USER ADMINISTRATION

Control access to the system and assign dedicated access rights to ensure only authorized personnel can make changes and view relevant information, while ensuring the highest level of security and integrity for your data. ARGUS offers flexible options, including integration with Active Directory, to streamline your user authentication.

## DEVICE MANAGEMENT

Seamlessly manage your cameras and printers with ARGUS to create an efficient production environment. All devices connected to the machines along your packaging line can be visualized and operated with a single ARGUS access point and HMI. Thanks to the modularity of hardware and software, all device variants can be flexibly implemented and combined.

## AUDIT TRAIL

Track the entire manufacturing process of your packaging in real-time. ARGUS creates a detailed log of all events and actions, giving you full transparency on the status of your production.

## GS1 COMPLIANCE

Automatically generate and assign accurate GS1 product codes for each item in the packaging line. This helps you to eliminate the risk of manual errors and ensures that your products comply with regulatory requirements.

## Your reliable partner for Vision Inspection

### LAETUS VISION INSPECTION

The foundation of a solid partnership begins with your inspection needs, complemented by our extensive expertise. We provide you with solution packages including terminals, IPCs, software, and equipment such as scanners and cameras to meet your current requirements while keeping your production line adaptable for upcoming alterations.

Rest assured that with vision inspection solutions from Laetus on your side, every step is covered. From on-site installation, qualification and validation, to comprehensive training and support – we are dedicated to ensuring your success.

### CONTINUITY THROUGH DEVELOPMENT

For five decades, Laetus has set the standard in vision control systems and gained trust from machine builders and pharmaceutical companies. With over 20,000 successfully installed ARGUS systems around the world, we are constantly motivated to remain the number one in product quality and packaging safety.

## WHY LAETUS?

**We partner with you**

**– from initial contact and implementation to continuous support.**

- 50 years of experience in vision inspection and quality control
- Expertise in track & trace solutions for pharma, food, beverage, cosmetics and other industries
- Flexibility in integrating solutions due to brand agnostic and modular approach
- Project management from consultation to implementation
- Training academy with individual offers
- Worldwide technical support with 24/7 hotline
